These statistics are estimates that account for missing data and may differ from other published sources. The county-level files which are the source of this information are not official FBI releases and are being provided for research purposes.

The Coverage Indicator refers to the relative size of the sample from which these estimates are based. A coverage indicator of 90% means that data covering 10% of the jurisdiction's population are estimated and that data from 90% of the jurisdiction's population are based on actual reports. Only jurisdictions with a coverage indicator at or above 90% are displayed in this application. Click on the **Data Coverage** tab to find out what years are available for your jurisdiction of interest.
